# 1 General information

*Before delving into the detailed installation process, let's provide some general information about Diamant-Unipool pool enclosures.*

Diamant-Unipool enclosures come pre-assembled, eliminating the need for drilling. All structural and small parts required for installation are included in the box. You only need to ensure you have the correct installation tools.

For a smooth installation process, ensure proper access to the pool. At least two people are required to handle the enclosure safely. Regularly check the structure's functions during installation to promptly correct any mistakes.

Prior to assembly, verify that the pavement offers a suitable foundation for the tracks. It must be even, with no waviness or height differences exceeding 0.5cm within 1m. The surface should be horizontal, with a maximum allowance of 2cm within 1m. The pavement should be a minimum of 10cm deep, drillable, and anchorable. Check the quality and structure of the pavement for unevenness (see Fig.2.).

Fig. 1. Ideal surface for proper functioning

Fig. 2. Non-suitable surface for proper functioning - pool enclosure doesn't work

## **Suitable surfaces (reinforced materials):**

Glued paving (tiles), concrete strips matching the track width, and well-installed wooden floors without plastic admixture.

## **Unsuitable surfaces (unreinforced materials):**

Sand or gravel beds, block paving, wood-plastic boards, and chipped pavers.

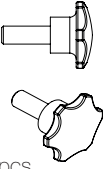

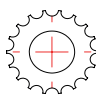

## **Track Installation:**

Due to the thermal expansion of track materials, gaps may form in track joints. These gaps vary based on installation period and weather conditions. In spring and autumn, gaps are rare, with a tolerance of 0.01 - 0.4 cm. In summer, the tolerance is 0.01 - 0.6 cm. This natural occurrence cannot be prevented.

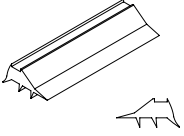

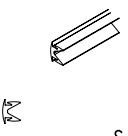

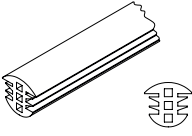

If the preparation for installation wasn't correct, tracks can become wavy, copying the surface, rendering the pool enclosure non-functional. If discovered, contact the responsible party for the surface to arrange disassembly, surface repair, and reassembly. Continued use in this condition can lead to extreme damage.

## 2 Parts list and tools

### 2.1 Fasteners

 <p>Diameter 6mm, length 45 mm, torex self-tapping screw</p> <p>49 pcs      <u>S.01</u></p>	 <p>Diameter 6,3 mm, length 25mm, flat head torx self- tapping screw</p> <p>2 pcs      <u>S.02</u></p>	 <p>M6 x 30 torx</p> <p><u>S.03</u></p>	 <p>M6 x 20 flat head torx</p> <p><u>S.04</u></p>

## 2 Parts list and tools

### 2.6 Required tools list

Ladder

Rubber/plastic hammer

Ratchet

Pneumatic rivet gun

Hand saw

Battery-powered rivet gun

Battery-powered drill

### 2.6 Enclosed tools list

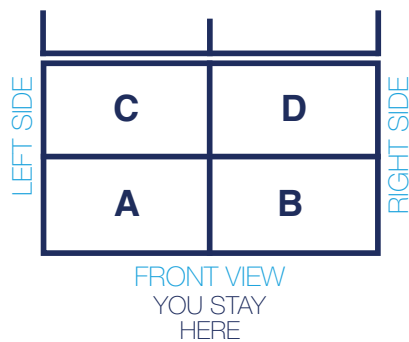

# 3 Track

## 3.1 Tracks measurements for correct installation

**BIRD VIEW of  
the biggest segment:**

- B-1: Total length of the pool
- B-2: Total width of the pool
- D-1: Length of the track under the pool enclosure
- D-2: Length of track extension
- D-3: Total length of the track
- R-1: Inner width of the pool enclosure
- r-1: Reserve of the pool enclosure
- r-2: Reserve width of the pool enclosure
- U-1: Basic diagonal measurement
- U-2: Control diagonal measurement

# 3 Track

## 3.2 Tracks measures

### BOX 1 - rail D.640-3

Inner width 3 500 mm

Length 6 400 + 2 500 mm

3 segments

## 3.3 Cross section of the track with its rails

# 3 Track

**NOTE**  
 The holes in the track are pre-drilled. If necessary, holes can be drilled at a different spacing. In that case always drill the holes according to the pattern (holes already drilled).

## 3.4 Layout of the track parts

**NOTE**  
 The front blocking bar S.129 must always be mounted at the front view where the largest segment is placed. The end blocking bar S.130 should be mounted at the back where is the smallest segment. The part S.130 facilitates water flow during cleaning. These bars are riveted once the pool enclosure is completed.

Description	Code	Pcs
Track, segment	D.B1.480.A; B	2
Track, segment	D.B1.410.A; B	2
Front blocking bar	S.129; S.129.1	1+1
End blocking bar	S.130; S.130.1	1+1

## 4 Segment 1 - Entrance variants

**R.35.1A**

**R.35.1B**

**R.35.1C**

**R.35.1D**

### NOTE

It is essential to determine the position of the side sliding door during this assembling step. Select one of the four positions and proceed to the corresponding page marked with letters A, B, C, or D.

# 5 Segment 1

## 5.1 Parts of the segment 1

Parts of the segment	Description	Pcs
N.B1.01.P	Front arch n.1	1
N.B1.01.S	Middle arch n.2	1
N.B1.01.Z	Back arch n.3	1
A.20.217	Guide	1
A.20.217.1	Guide with the drive	1
A.04.217	Longitudinal reinforcement with the drive	1
A.03.217	Longitudinal reinforcement	7
PC.B1.BV	Polycarbonate, half arch, entrance side	1
PC.B1.01	Polycarbonate, whole arch	1
S.G.01	Rubber seal	
S.G.02	Rubber seal	
S.G.05	Rubber seal	

Fasteners	Description	Placing	Pcs
S.01	Screw	Arch/guide	12
S.20.1	Rivet	Arch/reinforcement	32

## 5.2 Segment 1 - Entrance R.35.1A - Mounting workflow

1

Position the back arch N.B1.01.Z on a flat surface in such a way as to avoid scratching and with the arrow pointing downwards.

2

Insert polycarbonate PC.B1.01 into the arch.

3

Insert the middle arch on PC.B1.01 with the arrow pointing downwards.

4

Insert the guide with the drive A.20.217.1 on the sliding door side.  
Insert the guide A.20.217.  
Screw all the arches together using screws S.01.

5

Insert PC.B1.BV correctly according to the placement of the doors.

6

Insert longitudinal reinforcement A.04.217 with the drive and rivet with the arches.

7

Insert the front arch N.B1.01.P with the arrow pointing downwards. Screw the arch with the guides.

8

Insert longitudinal reinforcements A.03.217 and rivet them with the arches.

**NOTE**

The arch and guide are fastened together with S.01 screws.  
Longitudinal reinforcements are riveted using S.20.1 rivets.

## 5.3 Segment 1 - Entrance R.35.1B - Mounting workflow

1

Position the back arch N.B1.01.Z on a flat surface in such a way as to avoid scratching and with the arrow pointing downwards.

2

Insert polycarbonate PC.B1.01 into the arch.

3

Insert the middle arch on PC.B1.01 with the arrow pointing downwards.

4

Insert the guide with the drive A.20.217.1 on the sliding door side.  
Insert the guide A.20.217.  
Screw all the arches together using screws S.01.

5

Insert PC.B1.BV correctly according to the placement of the doors.

6

Insert longitudinal reinforcement A.04.217 with the drive and rivet with the arches.

7

Insert the front arch N.B1.01.P with the arrow pointing downwards. Screw the arch with the guides.

8

Insert longitudinal reinforcements A.03.217 and rivet them with the arches.

**NOTE**

The arch and guide are fastened together with S.01 screws. Longitudinal reinforcements are riveted using S.20.1 rivets.

## 5.4 Segment 1 - Entrance R.35.1C - Mounting workflow

1

Position the back arch N.B1.01.Z on a flat surface in such a way as to avoid scratching and with the arrow pointing downwards.

2

Insert polycarbonate PC.B1.BV correctly according to the placement of the doors.

3

Insert the middle arch on PC.B1.BV with the arrow pointing downwards.

4

Insert the guide with the drive A.20.217.1 on the sliding door side. Insert the guide A.20.217. Screw all the arches together using screws S.01.

5

Insert polycarbonate PC.B1.01 into the arch.

6

Insert longitudinal reinforcement A.04.217 with the drive and rivet with the arches.

7

Insert the front arch N.B1.01.P with the arrow pointing downwards. Screw the arch with the guides.

8

Insert longitudinal reinforcements A.03.217 and rivet them with the arches.

### NOTE

The arch and guide are fastened together with S.01 screws. Longitudinal reinforcements are riveted using S.20.1 rivets.

## 5.5 Segment 1 - Entrance R.35.1D - Mounting workflow

1

Position the back arch N.B1.01.Z on a flat surface in such a way as to avoid scratching and with the arrow pointing downwards.

2

Insert polycarbonate PC.B1.BV correctly according to the placement of the doors.

3

Insert the middle arch on PC.B1.BV with the arrow pointing downwards.

4

Insert the guide with the drive A.20.217.1 on the sliding door side. Insert the guide A.20.217. Screw all the arches together using screws S.01.

5

Insert polycarbonate PC.B1.01 into the arch.

6

Insert longitudinal reinforcement A.04.217 with the drive and rivet with the arches.

7

Insert the front arch N.B1.01.P with the arrow pointing downwards. Screw the arch with the guides.

8

Insert longitudinal reinforcements A.03.217 and rivet them with the arches.

### NOTE

The arch and guide are fastened together with S.01 screws. Longitudinal reinforcements are riveted using S.20.1 rivets.

# 5 Segment 1

## 5.6 Segment 1 - Rubber seal

Insert the rubber seal around the perimeter of the polycarbonate.

### NOTE

After mounting the segment, first attach the plastic caps S.140, end profiles, catchers, collectors, and finally insert the rubber seal.

## 5.7 Segment 1 - Entrance A,C - Catchers and collectors placement

The placement of segment catchers and collectors.  
Segment 1  
Entrance A, C

\* Pre-drilled

\*\* Adjust before tightening

## 5.8 Segment 1 - Entrance B, D - Catchers and collectors placement

The placement of segment catchers and collectors.  
Segment 1  
Entrance B, D

\* Pre-drilled  
\*\* Adjust before tightening

# 6 Segments 2, 3

## 6.1. Parts of the segments 2, 3

Segment 2	Description	Pcs	Segment 3	Description	Pcs
N.B1.02.P	Front arch n.1	1	N.B1.03.P	Front arch n.1	1
N.B1.02.S	Middle arch n.2	1	N.B1.03.S	Middle arch n.2	1
N.B1.02.Z	Back arch n.3	1	N.B1.03.Z	Back arch n.3	1
A.20.217.L	Guide left	1	A.20.217.L	Guide left	1
A.20.217.P	Guide right	1	A.20.217.P	Guide right	1
PC.B1.02	Polycarbonate, whole arch	2	PC.B1.03	Polycarbonate, whole arch	2
A.03.217	Longitudinal reinforcement	10	A.03.217	Longitudinal reinforcement	10
S.G.01	Rubber seal		S.G.01	Rubber seal	

Fasteners	Description	Placing	Pcs
S.01	Screw	Arch/guide	24
S.20.1	Rivet	Arch /reinforcement	80

# 6 Segments 2, 3

## 6.2 Segments 2, 3 - Mounting workflow

1

Position the back arch N.B1.01.Z on a flat surface in such a way as to avoid scratching and with the arrow pointing downwards.

2

Insert polycarbonate PC.B1.02 into the arch.

3

Insert the middle arch N.B1.02.S on PC.B1.02 with the arrow pointing downwards.

# 6 Segments 2, 3

4

Insert PC.B1.02 into the arch.

5

Insert the front arch N.B1.02.P on PC.B1.02 with the arrow pointing downwards.

6

Insert the 2 guides A.20.217.L and A.20.217.P and screw them with the arches.

## 6 Segments 2, 3

7

Insert longitudinal reinforcements A.03.217 and rivet them.

8

Insert the rubber seal S.G.01 around the perimeter of the polycarbonate.

### NOTE

The arch and guide are fastened together with S.01 screws. Longitudinal reinforcements are riveted using S.20.1 rivets. After mounting the segment, attach the plastic caps.

# 6 Segments 2, 3

## 6.3 Middle segment 2 - Collectors

**NOTE**  
The segment collectors are always placed on the side of the side door entrance.

The placement of segment collector.

Segment 2  
Entrance A, C

The placement of segment collector.

Segment 2  
Entrance B, D

\* Pre-drilled

\*\* Adjust before tightening

# 6 Segments 2, 3

## 6.4 Last segment 3 - Catchers

\* Pre-drilled  
\*\* Adjust before tightening

## 7 Front and back ends

Front and back ends are always mounted after the corresponding segment has been installed on the track.

### NOTE

#### Ends Assembly

Position the end B1.B and after the end B1.S against the threaded holes on the surface of the arch.

Mount the front and back ends of the segment by screwing them using the special large Diamant screws S.06.

# 8 Entrance - side sliding door

## 8.1 Entrance - Side sliding door - Parts of the side sliding door

Code	Description	Pcs
V.B1.P	Arch	1
V.B1.Z	Arch	1
V.01.P	Guide	2
PC.B1.D	Polycarbonate	1
A.03.217	Longitudinal reinforcement	2
S.G.01	Rubber seal	
S.114	Door lock	1
S.109	Door handle	1

Fasteners	Description	Placing	Pcs
S.01	screw	Arch / guide / door handle	10
S.20.1	rivet	Arch / longitudinal reinforcement	8
S.02	screw	Arch / door handle	2
S.23	rivet	Catcher / guide	4

After installing the door lock, adjust the dowel pin to the correct height by cutting.

# 8 Entrance - side sliding door

## 8.2 Entrance - Side sliding door - Mounting workflow

1

Position the back arch V.B1.Z on a flat surface in such a way as to avoid scratching and with the arrow pointing downwards.

2

Insert polycarbonate PC.B1.D into the arch.

3

Insert the guide V.01.P and screw it with the back arch V.B1.Z.

## 8 Entrance - side sliding door

4

Insert the second guide V.01.P and screw it with the back arch V.B1.Z.

5

Insert the front arch V.B1.P on PC.B1.D with the arrow pointing downwards and screw it with the guide V.01.P.

6

Insert longitudinal reinforcements A.03.217 and rivet them with the arches.

## 8 Entrance - side sliding door

7

Insert the rubber seal S.G.01 around the perimeter of the polycarbonate.

8

Pre-assembled.  
Rivet with 4 pcs S.23.

### NOTE

After mounting the entrance, attach the plastic caps S.116 and S.140.

# 8 Entrance - side sliding door

## 8.3 Entrance - Side sliding door - Installation

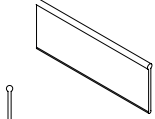

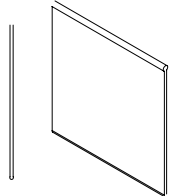

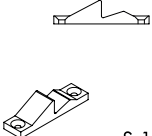

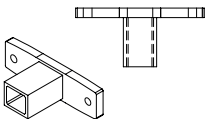

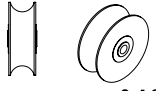

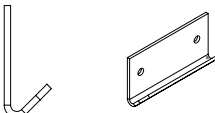

Trim the dowel pin to fit within a maximum tolerance of 1-2 mm.

After installing the door lock, adjust the dowel pin to the correct height by cutting.
